Protecto Flex Flashing Tape

Protecto Wrap BT20XL

PCBC Booth #6130

SEBC Booth #1063

Protecto Flex and BT20XL Window and Door Flashing Tapes are an easy and effective way to seal windows and doors with a dependable waterproof barrier. Both Protecto Wrap BT20XL for straight/flat surfaces and Protecto Flex Flashing Tape for curved/radius surfaces, are easily installed (just peel and stick). Besides stopping mold causing moisture, these products save on heating and cooling costs.

Both products seal window and door perimeters to plywood, OSB, foamboard, concrete, aluminum, polyethylene, vinyl, masonry and DensGlass Gold® surfaces to create a total air and water barrier that self seals around nails, screws and staples.
