- Adheres to Numerous Surfaces
- Available for 2 x 4 and 2 x 6 Sill Plate Construction
- Results in an Average of 35% in Gas & Electric Energy Savings

**The ONLY Self-Adhesive Air & Moisture Waterproofing Sill Sealer**

## Visit Booth #6130

at the PCBC Show to see how Protecto Triple Guard Energy Sill Sealer completely seals off the cold joint between a home's foundation and the wood frame construction. Triple Guard results in an average of 35% in gas & electric energy savings. It also stops moisture that causes mold, plus stops rodent and insect infiltration.

With those results, it's easy to get customers to upgrade to Triple Guard, especially since it will pay for itself within 3-6 months in energy savings.
