Protecto Form Flash 2 EPDM

Protecto Form Flash 2 EPDM is a peel and stick flexible flashing tape used as a primary air and moisture seal around roof openings and penetrations in residential and commercial construction.

Protecto Form Flash 2 EPDM is waterproof and air impermeable and has the capability to span gaps between roof surfaces and building components up to 1/4". Protecto Form Flash 2 EPDM seals up penetrations in roof assemblies and helps make buildings and homes more air and water tight.

Some applications include sealing around:

- Electrical Power Mast
- Pipe Penetrations
- Roof Ventilation
- Plumbing Soil Penetrations
- Sky Lights
- Roof to Chimneys
- Roof to Wall
- Patching Valleys
- Patching gutters
- Patching shingles
- CMU
- Poured in Place Concrete

Protecto Form Flash 2 EPDM has an aggressive butyl based adhesive that adheres to most building products found in everyday construction. The state of the art UV resistant film facer has excellent flexibility and extensibility in all directions allowing Protecto Form Flash 2 EPDM to stretch and conform to irregular and difficult to seal surfaces found in building construction. Protecto Form Flash 2 EPDM will adhere to plywood, OSB, PVC, Steel, Aluminum, and Plastic. Butyl adhesive remains flexible in extreme hot and cold temperatures.

Protecto Form Flash 2 EPDM is compatible with most products used in home and commercial construction. Protecto Form Flash 2 EPDM should not be used in conjunction with sealants containing solvents, mineral spirits and products containing hydro carbons or VOC's.

THAT PROTECT

*Patent Pending

Protecto Form Flash 2 EPDM

A Peel and Stick, Flexible EPDM
Roof Penetration Flashing Tape.
Protecto Form Flash 2 EPDM
Stretches, Conforms and Seals Around
Penetrations in Roofs and Walls.

FEATURES AND BENEFITS:

- Stops Heating and Air Conditioning Loss around penetrations
- Available in 4", 6" x 15' rolls.
- Rated for full exposure to UV
- Seals around properly installed fasteners
- Forms a positive air/vapor barrier
- Forms an Insect and Rodent Barrier around penetrations
- Conformable around irregular shapes
- Will adhere to most building products
- Compatible with most building products and EPDM
- Excellent flexibility and extensibility in all directions
